

Prompts Audit Log

Prompt 1

Write each prompt I send to you into a file prompts.txt, so I can audit the work.

Prompt 2

I want to develop Feature Voting System with following requirements.

I want to do this using Flask & Db as postgres.

Design a PostgreSQL schema for a feature voting system where users can post a feature request and other users can upvote it.

Create a Jetpack Compose Android screen that shows a list of features with titles, descriptions, and vote counts, and buttons to upvote.

So flask+postgres as backend for api.

frontend UI: CHOOSE ONE native mobile: iOS or Android

Prompt 3

I have never used android jetpack.

Give me steps to setup on local machine windows & how to run it to verify complete flask application
